

Quick Disconnect Hand Held Pitot Tubes & Pitot Blades

The hand held pitot tube is still the most efficient, economical, and accurate way to measure water discharge from hose nozzles, hydrants or other types of openings. **NEMCO** has manufactured these for well over 50 years. Our models are designed to be simple, sturdy, functional, and inexpensive. Three pitot handle designs, coupled with six different interchangeable pitot blades, provide the most versatility in the industry. All models feature an air chamber that is machined into the handle. This serves to dampen the gauge needle under pulsation, thus giving a more accurate reading. A bleeder is not incorporated into our design, simply because it would defeat the purpose of the air chamber. Removal of the gauge via the quick disconnect fitting provides for fast draining of the tube. **Note: All six of our pitot blades will fit any of our handles!**

Our handles feature a high quality Parker B23N brass quick disconnect fitting with stainless locking balls. This allows for easy removal of the gauge, fast draining of the tube and convenient rotation of the pressure gauge during use. Since the female portion of the fitting remains on the gauge, no wrenching or twisting of the gauge is necessary during hook up or removal. This prevents costly damage caused by hand twisting the gauge into a fitting and results in longer gauge accuracy.

Hex Handle Quick Disconnect Pitot Tube

Our most popular handle. Machined from solid brass hex stock with rounded corners for comfortable use. Simple, solid and able to be used with one or two hands. The 8" handle is nickel plated and comes with both ends of the quick disconnect fitting.

101	w/ standard metal blade	\$95.95
101A	w/ ultra-thin straight metal blade (as shown)	\$114.95
101B	w/ ultra-thin notched metal blade	\$114.95
101C	w/ plastic straight blade (2) (spare blade included)	\$95.95
101D	w/ plastic notched blade (2) (spare blade included)	\$95.95
101E	w/ extra-long straight ultra-thin metal blade	\$134.95

Round Handle Quick Disconnect Pitot Tube

Machined from solid brass stock. This model is easy to hold, compact (7" handle portion), and very durable. Nickel plated and comes with both ends of the quick disconnect fitting.

104	w/ standard metal blade (as shown)	\$95.95
104A	w/ ultra thin straight metal blade	\$114.95
104B	w/ ultra thin notched metal blade	\$114.95
104C	w/ plastic straight blade (2) (spare blade included)	\$95.95
104D	w/ plastic notched blade (2) (spare blade included)	\$95.95
104E	w/ extra-long straight ultra thin metal blade	\$134.95

Ultra-Light Quick Disconnect Stainless Pitot Tube

Light and compact, this model is made from **stainless tubing**. *We recommend this model with the notched or straight ultra-thin blade.* This model is made for those needing a carry-friendly unit. It is very serviceable, but not as rugged as our other models.

107	w/ standard metal blade	\$109.95
107A	w/ ultra-thin straight metal blade	\$129.95
107B	w/ ultra-thin notched metal blade (as shown)	\$129.95
107C	w/ plastic straight blade (2) (spare blade included)	\$109.95
107D	w/ plastic notched blade (2) (spare blade included)	\$109.95
107E	w/ extra-long straight ultra thin metal blade	\$149.95

Pitot Blades

108	standard metal blade	\$29.95
109	straight plastic blade w/ stainless tubing	\$14.95
110	notched plastic blade w/ stainless tubing	\$14.95
111	ultra-thin straight metal blade w/ stainless tubing	\$49.95
112	ultra-thin Notched metal blade w/ stainless tubing	\$49.95
113	extra-Long, ultra-thin straight metal blade w/ stainless tubing	\$69.95

Our #110 and #112 notched blades provide perfect placement of the stainless pick-up tube for playpipes, hydrants and our 2 1/4" hydrant flow nozzle.
