

## Test Kits

The pictured test kits represent popular combinations of the components. **If one of our selections doesn't suit your needs, then just select what you would like and we will quickly furnish a quote.** When ordering please specify the gauge pressures you need.

**#801 No. 1 Test Kit:** Inexpensive, but complete! Popular for in-house testing, this kit includes #101 hex handle quick disconnect pitot w/ #108 spare metal blade, 2 of the #202 Custom Model liquid filled gauges (2 ½" Dial, any psi), #301 brass hydrant test cap, #303 brass hose test cap, #304 brass faucet test cap, #402 single ball valve quick disconnect bleeder, thread tape, and #903 Plano small deluxe carry case. **\$350.00**

**#802 Shortie Test Kit:** Designed for those who need to travel light. Starting with the #101 hex handle quick disconnect pitot with #108 spare metal blade, then adding 2 of the #202 Custom Model liquid filled gauges (2 ½" Dial, any psi). The #301 brass hydrant test cap and the #402 single ball valve quick disconnect bleeder, furnished in a Plano #903 small deluxe case. **\$310.00**

**#804 Shortie Test Kit Ultra:** A superb compact test kit. Includes the #107A ultra-light quick disconnect pitot tube with the ultra-thin straight blade and a spare #112 ultra-thin notched blade. For the gauges, 2 of the #204 Ashcroft model 1009AW flutterguard gauges (any available psi) with NIST calibration certificates. We complete this kit with the #301 brass hydrant test cap, #404 double ball valve quick disconnect bleeder and Plano #903 deluxe case. **\$425.00**

**#805 All Purpose Test Kit:** Includes all of our most popular items. #101 quick disconnect pitot tube with #108 spare blade, 2 of the #202 Custom Model liquid filled gauge (2 ½" Dial), #501 inspector's hydrant flow nozzle, #404 double ball valve quick disconnect bleeder, #301 brass hydrant test cap, #303 brass hose cap, #304 brass faucet test cap and #905 Plano large All Weather Case. **\$465.00**

**#806 Inspector's Test Kit:** This kit represents one that will do the job and is packaged with the very rugged #905 Plano large All Weather Case. It continues to be a popular choice and a great value. Included is the #101A hex handle quick disconnect pitot tube with the ultra-thin straight blade and a #112 ultra-thin notched blade as a spare, 2 of the #203 dry stabilizer gauge (3.2" dial - any available psi) with 1% full scale accuracy and NIST gauge certification, #301 brass hydrant test cap, #303 brass hose cap, #304 brass faucet cap, #402 single ball valve quick disconnect bleeder and #501 inspector's hydrant flow nozzle. **\$555.00**

**#807 Deluxe Test Kit:** This is a fantastic test kit at a great price. Featuring the #101A hex handle quick disconnect pitot tube with an ultra-thin straight blade and spare #112 notched ultra-thin blade. The hardware includes a #301 brass hydrant test cap, #303 brass hose test cap, #304 brass faucet test cap, #404 quick disconnect double ball valve bleeder, #501 inspector's hydrant flow nozzle, #502 brass flow nozzle elbow, spare gaskets, thread tape and a #905 Plano large All Weather Case. For the gauges we selected the dependable and easy to read #205 Ashcroft model 1009AW flutterguard gauges with 3.5" dial and 1% full scale accuracy (any available psi). NIST gauge certification included.

**\$700.00**

**#808 Deluxe Test Kit:** This is a versatile and complete test kit featuring spare gauges for maximum redundancy in the field. It's packaged with the #101A hex handle quick disconnect pitot tube with and ultra-thin straight blade and a #112 notched ultra-thin blade for a spare. Main hardware includes a #301 brass hydrant test cap, #303 brass hose test cap, #304 brass faucet test cap, #402 single ball valve quick disconnect bleeder, #501 inspector's hydrant flow nozzle, #502 brass flow nozzle elbow, spare gaskets, thread tape and a #905 Plano large All Weather Case. We have included 2 of the #212 Ashcroft DG25 digital gauges and 2 of the #205 Ashcroft model 1009AW flutterguard gauges with 3.5" dial and 1% full scale accuracy (any available psi). NIST gauge certification and quick disconnect fittings included on all 4 gauges.

**\$1185.00**

**#809 Ultra Test Kit:** This is the best of everything you could need. Starting off with 2 pitot tubes: the model #101 with the standard metal blade and a #104A with an ultra-thin straight blade. A #112 notched ultra-thin blade is included as a spare. For the gauges we have included 2 of the #212 Ashcroft DG25 digital gauges and 2 of the #205 Ashcroft model 1009AW flutterguard gauges with 3.5" dial and 1% full scale accuracy (any available psi). All of these gauges are supplied with quick disconnect fittings and NIST gauge certification. Main hardware includes a #301 brass hydrant test cap, #303 brass hose test cap, #304 brass faucet test cap, #404 quick disconnect double ball valve bleeder, #501 inspector's hydrant flow nozzle, #502 brass flow nozzle elbow, spare gaskets, thread tape and a #906 Plano extra large All Weather Case. Completing this kit is the #601 model CDT-2000HD digital tachometer with both photo and contact modes and accuracy certification.

**\$1500.00**

### **Plano Carrying Cases**
